

Queensland Construction

...the smart choice

PMT Water Engineering

PMT Water Engineering specialise in providing world class solutions for liquid management, be it storage or treatment.

The company market and distribute products on behalf of their manufacturing parent company Asia Pacific Tanks Pty Ltd and other leading manufacturers.

PMT Water Engineering has been supplying tanks to remote rural Australia since 1980 and in the 1990's commenced commercial exporting to the Far East and Pacific Rim Regions. Good expertise was gained in designing and supplying for both arid and humid marine environments.

The company has now expanded their client base in that region and beyond, with exports to the Middle East and Europe. The industries, government authorities and agencies serviced include resource and mining, hospitality, resorts, municipal cities and towns and rural – country dwellers, horticultural agricultural producers and beverage and water bottling companies.

Tanks of rigid, prefabricated designs, which have bolted assembly on site. Also flexible tankage is offered for a variety of containment liquids. PMT Water Engineering provides water and sewage treatment plants in packaged designs suitable for export.
